

altaTM healthcare+

a:

alta™ healthcare

Say goodbye to crunchy.

Healthcare environments face unique challenges and require a different level of attention for their textile seating applications.

But harsh, over-engineered “super fabrics” are not the only option. Alta is an award-winning fabric technology designed to deliver the correct level of protection for each application, whether it’s lighter-duty administrative areas or heavy-duty and high-traffic areas such as lobbies, waiting rooms or food & beverage concessions/dining rooms.

With Alta, soft and comfortable healthcare-appropriate textiles are easy to maintain and tough as nails, without looking or feeling that way. Healthcare settings and the people who inhabit them should be able to enjoy these benefits. Without compromise.

features & benefits

✓ FR Code Compliance	NFPA 260 AND CAL TB 117-2013
✓ Repellency (High)	AATCC 22 and 118
✓ Cleanability (High)	ASTM D1308/CFFA 141 Method II
✓ Liquid Barrier (High)*	AATCC 127
✓ Abrasion (High)	ASTM D4157/D4966
✓ Seam Strength (High)	ASTM D4034
✓ Antimicrobial (High)*	ISO 20743

*Optional, depending on seating application needs.

environmental

- ✔ Makes fabric easy to clean and maintain
- ✔ Eco-effective and sustainable technology, extending the life-cycle of fabrics and furniture and reducing landfill with proper maintenance
- ✔ Permanent, water-based technology that lasts for the life of the fabric itself
- ✔ Utilizes less chemistry than many leading brands without compromising performance
- ✔ Free of any solvents or VOCs (volatile organic compounds), PFOS, PFOA, formaldehyde, heavy metals or phthalates
- ✔ Passes EPA and California Prop 65 environmental standards

Join the Resistance.

We exist to transform the contract textiles world by challenging the status quo.

We don't make or sell fabrics; we make them better with transformative technologies and certified testing that redefine what it means to be "high performance."

Healthcare textiles are no exception. Our formulations are engineered to meet the particular needs of these environments, so when real life takes hold – no matter where that happens – your fabrics will perform and endure beautifully.
