**SUPREEN™**

# The fabric that keeps liquid out and beauty in.

Supreen marries cutting-edge woven and coated technology to create a unique liquid-barrier barrier textile. The result is a hard-working upholstery fabric with a luxurious look and a surprisingly supple hand. Supreen outperforms in the places and spaces where life hits hard.

### **Surprisingly Soft**

The innovators that turned old-fashioned vinyl into premium faux leather, now bring you Supreen. Supreen is a performance composite material that retains the beauty and luxurious softness of a woven fabric, while incorporating the performance of a coated textile. It has an incredibly supple hand, upholsters extremely well and feels wonderfully soft to the touch.

### **A Total Liquid Barrier**

Supreen represents an evolution in performance fabrics beyond the moisture barrier. Liquids will not penetrate the material — not immediately after a spill, not 24 hours later, not ever.

### **Designed to Outperform**

Supreen exceeds contract grade upholstery standards and is suitable for the toughest high-traffic environments.

### **Ready for Bleach**

Supreen is tough enough for diluted bleach and will stand up to regular cleaning, making it particularly useful for healthcare installations.

### **Environmentally Conscious**

Supreen's stain repellent technology is free of fluorocarbon. Instead, a proprietary silicone blend is embedded in the fiber to protect against liquids and stains. This PFC- and PFOA-free technology makes it more friendly to the environment — and human health.
